Presentation Topic

Keeping it Personal Building a positive safety culture through coaching

Does your organization strive to create a positive and sustainable safety culture, but struggles for ideas on how to make it happen? Join us and learn why traditional approaches to safety communications actually work **AGAINST** our efforts to create a healthy safety culture; how to prevent misunderstandings; and how to avoid the pitfalls of “safety sound bites”, and create positive, sustainable changes in safety culture. We will review the importance of clear communication of safety across a whole organization.

Discussion topics include:

- Creating concise expectations for safety that are documented and communicated to all levels
- Appropriate implementation of disciplinary measures to steer actions for the desired outcome
- Empowering and motivating employees to take responsibility for safety

To RSVP

Seminars are free, but space is limited,
so sign up early!

Pre-registration REQUIRED, [RSVP via email here](#)

Joe Moulton, CHMM, BSI, Senior Consultant

joe.moulton@bsigroup.com

Light breakfast and beverages provided
Registration, networking and breakfast from 7:00 to 7:15 AM
Seminar begins at 7:15 AM

About the presenters

**John Karajanis, Senior Consultant,
BSI EHS Services and Solutions**

John's passion for safety is contagious! He has over 20 years' experience in coordinating, implementing, and leading safety programs for organizations that operate in high hazard industries. His leadership in safety management has not only been rewarding but has also provided diverse experience in construction and general industry safety. At BSI, John leads our construction safety practice, where he serves owners and general contractors to enhance the safety culture of their workforce and job sites.

**Dennis Patterson, Consultant,
BSI EHS Services and Solutions**

Dennis has over six years of experience working in the construction industry, oil & gas, drilling, pipeline, semiconductor, and biotech facilities. He believes in taking proactive steps to address safety issues and taking care of his team. He has knowledge and experience working with Cal OSHA construction safety regulations, writing new programs, and annual re-evaluations and updates. Dennis serves as a BSI Project Manager where he implements safety programs and coaches team members to sustain a positive safety culture.
