Presentation Topic

Storm Water Compliance in Construction Tips for Reporting

Your construction site may have endured this winter's storms, but are YOU ready to report on the storm water runoff left in its wake? Join us for guidance on how to effectively utilize SMARTS to ensure that the results of your sampling and monitoring programs are properly reported. We will review examples of common errors that Builders make when submitting data, and how you can avoid them.

Discussion topics include:

- A brief overview of the Construction General Permit (CGP) and how coverage may apply to your project
- Highlighting the important deadlines and due dates to add to your compliance calendars
- SMARTS tips and tricks to use when submitting analytical results and annual reports

To RSVP

Seminars are free, but space is limited, so sign up early!

Pre-registration **REQUIRED**, [RSVP via email here](#)

Joe Moulton, CHMM, BSI, Senior Consultant
T: +1 510 995 5425 | C: +1 510 681 9728
joe.moulton@bsigroup.com

Light breakfast and beverages provided
Registration, networking and breakfast from 7:00 to 7:15 AM
Seminar begins at 7:15 AM

About the presenters

Elizabeth Zernik, CPESC, QSD/QSP, ToR/QISP/CGL Senior Consultant with BSI EHS Services and Solutions
Elizabeth has over 20 years of experience in environmental and stormwater quality compliance. She is a Qualified SWPPP Developer (QSD) and Qualified SWPPP Practitioner (QSP) for the CGP in California. She has experience in stormwater projects nationwide and has served as a Stormwater Pollution Prevention Manager for a number of construction sites throughout California where she provided support to clients via SWPPP development, inspections, sampling, training, reporting, and SMARTS submittal filing. At BSI, she is a key member of our Storm Water Team who loves to share her strategies to achieve compliance across our diverse client base.
